A Tillotson Company

POLYMERS

Naturally occurring and man-made polymers are essential building blocks of hand protection. Specific polymers protect workers from specific hazards. There is no ideal glove that works in every situation. Best utilizes a variety of polymer coatings and fabrics, designed for a variety of tasks.

Natural Rubber

Natural rubber, the most elastic substance known is found in over two hundred plants including the rubber tree (Hevea Brasiliensis), the source of natural rubber latex used to manufacture some Best gloves.

Natural rubber is a flexible and soft, yet tough and durable coating that provides excellent protection from physical hazards and provides an outstanding grip. Natural rubber provides excellent protection from exposure to aqueous chemicals such as acids and caustics, and limited protection from alcohols and ketones. Natural rubber gloves do not hold up well in organic solvents, oils, greases or fuels such as kerosene or gasoline.

CAUTION: Natural rubber latex has been shown to cause allergic reactions in sensitized individuals.

Neoprene (Polychloroprene, CR)

Strong, durable neoprene gloves provide excellent protection from physical hazards such as cuts and abrasions and also provide excellent chemical resistance for protection from exposure to organic and inorganic acids. Neoprene gloves also provide

excellent protection from many organic solvents, oils, greases and petrochemicals and resist degradation from ozone, sunlight and oxidation. In addition, Neoprene remains functional and flexible at temperatures ranging from -10° to 300° F (-23° to 150° C).

Nitrile (Acrylonitrile-Butadiene rubber)

Nitrile, a versatile synthetic copolymer, is used to make a variety of gloves ranging from heavy duty work gloves to ultra-thin medical and clean room gloves. Nitrile coating provides tough protection from physical hazards such as cut, puncture or abrasion. Nitrile dipped gloves also provide chemical resistance to petrochemicals (especially fuels), oils, greases, pesticides and other agricultural chemicals while providing excellent dexterity.

PVC (Polyvinyl Chloride)

PVC is an economical synthetic thermoplastic polymer that is exceptionally durable. PVC gloves provide excellent protection from limited chemical exposure and physical hazard protection. They are noted for being durable and function well in temperatures ranging from -30° up to 212°F (-34° up to 100° C).

Butyl (Butyl Rubber)

Butyl Rubber's tight molecular structure provides excellent chemical resistance to gases and ketones. Butyl gloves are manufactured in unsupported version only and are used by the military for protection from chemical warfare agents. Butyl rubber is severely affected by exposure to fuels and aliphatic and aromatic hydrocarbon solvents.

Viton® (Fluoroelastomer)

Viton provides excellent chemical resistance to fuels used in the aerospace industry. It provides excellent protection from exposure to aromatic hydrocarbons such as benzene, toluene or xylene. Viton gloves are available in unsupported version only. For working with extremely hazardous chemicals such as carcinogenic or highly toxic chemicals, Viton works where no other glove works.

Polymer Combinations for the Best® of Both Worlds

Certain combinations of polymers are used to make hybrid gloves that feature neoprene over natural rubber latex gloves that are used in Best Chem Master™ gloves. Viton® over Butyl is used to make the highly chemical resistant Best Viton® II glove. Nitrile is used as an overdip in several Best natural rubber gloves to provide added resistance to aging, ozone and chemicals.

Viton® is a registered trademark of DuPont Performance Elastomers.

CUFF DESIGNS

Knitwrist: designed to keep glove firmly in place, prevents debris from entering glove, enhances warmth, should not be used where quick glove removal is needed.

Safety Cuff: allows glove to slide on and off easily, helps protect wrist, releases quickly from hand, won't soften when exposed to perspiration or washing.

Gauntlet: provides additional protection for lower forearm, allows maximum forearm dexterity, lets glove slide on and off easily, protects wrist, releases quickly from hand.

Note: Unsupported gloves may have a rolled cuff, a serrated cuff or a straight cuff.

Color Coded Cuffs: Many of our styles have color-coded cuffs for easy size identification and pairing after laundering.

GRIP DESIGNS

Supported gloves

textured grip

wrinkle finish

breathable vinyl

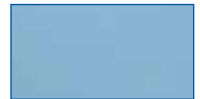

rough nitrile

Unsupported gloves

bisque finish

smooth finish

tractor tread

Note: Some Best gloves have no special grip design, yet still provide good gripping power due to the intrinsic properties of the particular glove polymer.

Disposable Gloves: This category of unsupported gloves is generally characterized as a thin-gauge glove that is not intended for repeated use. They may have a donning agent such as powder or a polyurethane slip coating, or powder-free.

Laminated Gloves: This special nitrile-coated fabric is made by transfer-coating the nitrile polymer onto a textured surface and then laminating the nitrile film onto Sanitized® poly-cotton fabric for superior comfort and flexibility.

Impregnated Gloves: This special nitrile or PVC-coated fabric is made by knife-coating nitrile or PVC directly onto Sanitized® cotton fabric.

Supported Gloves: These gloves offer a polymer coating over a cotton, nylon or aramid liner. The textile substrate imparts added strength and resistance to abrasion, cuts and punctures.

Unsupported Gloves: These are polymer gloves with no textile lining. These gloves include heavyweight, medium weight or disposable gloves. They may be chlorinated or have a cotton flock lining for easier donning.

Cut Resistant Gloves: This special category is characterized by the utility of the gloves and includes either polymer coated gloves or special high performance yarns that are designed to impart cut-resistance or combinations of these.

GLOVE SIZE CHART

Glove Size	XS	S	M	L	XL
Hand Size	6-7	7-8	8-9	9-10	10-11

Sizing: Use a tape measure to find the circumference of your hand around the palm area. This is close to your actual glove size. For example, 7" is equal to a size 7 glove. Sizes can vary among different manufacturers and styles. For easy size comparison, refer to the above chart and note color coding.

MIL THICKNESS

1 mil = 1/1000 of an inch

WHAT'S THE BEST® GLOVE FOR ME?

This question is at the core of all that we do here at Best®. Helping you find the answer is our job. It's also the engine that drives our new home on the World Wide Web, www.bestglove.ca.

On every web page, you'll find a dedicated button enabling you to search for the best glove for you by the criteria important to you.

You can initiate a Search based on specific applications, hazards or chemicals. Your results will appear based on your criteria.

In addition, each glove is further categorized by performance in cut, puncture, wear, chemical permeation and price.

Glove	Latex	Nitrile	PU	Puncture	Wear	Price
Best Butyl 178	✓	✓	✓	✓	✓	✓
Best Butyl 179	✓	✓	✓	✓	✓	✓
The Original Nitrile Glove 100PW	✓	✓	✓	✓	✓	✓
The Original Nitrile Glove 100FW	✓	✓	✓	✓	✓	✓
Chemrest 723	✓	✓	✓	✓	✓	✓

Use these criteria to further refine your search by simply clicking and re-ordering what's most important to you and your needs. Working with a specific chemical but need a puncture-resistant glove for the job? Simply search by that chemical and then re-order your results by gloves that perform the best in puncture-resistance. Need greater information and deeper testing results for chemical applications?

Simply click onto our Chemrest button and access the world's most comprehensive chemical reference database designed for hand protection. With more than 600 individual chemicals, over 100 chemical classes, and all organized by CAS#, Chemrest is the most thorough chemical permeation and testing glove reference database available.

Bestglove.ca also gives you access to the latest information on our award-winning hand protection, direct links to our list of authorized distributors, search by postal code for your local Best sales representative and so much more. You can even download .PDFs of our sell sheets and flyers, technical data sheets as well as this catalog. We hope you find our new home your new home for identifying, evaluating and selecting the best glove for you and your job.

DISPOSABLE GLOVES

6

Best® is the most accomplished innovator and manufacturer of disposable hand protection ever. The first to create disposable nitrile and accelerator-free nitrile hand protection – we offer the broadest line of disposable choices available within the industry.

N-DEX
NIGHTHAWK™

Born to protect

the newest member to the
N-DEX® family and the latest in
disposable nitrile
hand protection

when the job calls for
absolute
comfort and tactility

Sleek, sophisticated styling, with impressive specs under the hood – the NightHawk™ is the latest in disposable nitrile hand protection.

Best® introduces the newest member to the N-DEX® family, NightHawk™, with its all stealth-black color, the NightHawk™ is an accelerator-free, textured fingertip disposable nitrile glove offering the world's least allergenic disposable nitrile protection.

Not to mention some very impressive static-dissipative properties to boot. Ideal for jobs where the going gets messy or the application calls for uncompromising tactile feel and touch, NightHawk™ is perfect for workers in automotive, electronic assembly, laboratory, law-enforcement and security environments.

CUT RESISTANT GLOVES

28

More than 80-percent of all hand and arm injuries are due to cuts and lacerations. Most of which can be traced to an absence of gloves. That's why we make gloves and protective sleeves that not only resist cuts, but are also comfortable to wear, ensuring compliancy as well as safety.

ANSI/ISEA CUT RESISTANCE LEVELS

Level	Weight needed to cut through material with 20mm of blade travel (grams)
0	<200
1	>200 
2	>500 
3	>1,000 
4	>1,500 
5	>3,500 

ANSI/ISEA Cut Resistance Levels

- Using the ASTM F1790 test (CPP or TDM tester).
- Provides manufacturers with a mechanism to classify their products.
- Information from this testing and classification can be used to help users select appropriate hand protection.

End-users must select gloves based on a risk assessment involving the identification of hazards and determination of risk exposure to those hazards. See page 5.

INSULATED AND SPECIALTY GLOVES

34

Not all jobs are created the same. That's why we make custom hand protection for "non-routine" applications. Whether it's protection from the elements, extreme temperatures or even more extreme chemicals, our insulated and specialty glove selection covers all the bases – and acids too.

YOU KNOW THOSE PEOPLE WHO HAVE TO GET THEIR HANDS IN EVERYTHING? WE MAKE THEIR GLOVES.

Good news for anyone who works with nearly anything. We have your gloves. Every kind from disposable to general purpose, to cut and chemical resistant. Because gloves are all we make, we're able to test, design and monitor the manufacturing for superior quality. Want to know more? Call now at 1-800-565-BEST or visit our web site at www.bestglove.ca. You have nothing to lose.

INSULATED AND SPECIALTY GLOVES

BEST IS...

Quite simply, Best Manufacturing is the world's most innovative and leading designer, developer and marketer of hand protection. With a history of firsts stretching back to the 1950s and its first patented crinkle-finished rubber coated work glove the Nitty Gritty®, Best has continually searched to provide hand solutions to the men and women on the front lines of industry, medicine and homeland security.

• INNOVATION

By percentage, no other glove manufacturer spends more on research and development and overall technical services than does Best Manufacturing. With our gleaming new, eight thousand square-foot Tillotson-Looper Technical Center, Best not only develops new hand protection but also conducts the most comprehensive chemical analysis and testing within the personal protective equipment industry. It's that commitment that delivers revolutionary

breakthroughs like N-DEX® and N-DEX® Free, the world's first disposable nitrile and accelerator-free nitrile gloves.

• SUPPORT

Best's dedicated roster of worldwide sales representatives means that no matter where you and your job are, access to a knowledgeable hand protection expert is always nearby. Best hand protection specialists can help you identify your hazardous challenges in the workplace and the hand protection solutions to meet them. And with our new website simply click onto "Contact Us" and find your salesperson by postal code. And don't forget to ask for a comprehensive Best Hand & Arm Hazard Assessment™.

• SERVICE

Extending the absolute Best in customer service is more than simply lip service at Best. For the third consecutive year, we've achieved a 97.9 percent customer satisfaction and on-time delivery performance score. Our Customer Service department consistently ranks among the top among safety manufacturers of any size. That satisfaction rating also owes to our continuous development of new and more customer-friendly terms for doing business. Programs like our Best Bet™ program that allows customers to try before they buy.

OUR QUALITY

At Best, we are dedicated to supplying you with the highest quality hand protection available in the world today. We have dedicated professionals at each of our manufacturing facilities to ensure that every glove meets our tight specifications for quality.

Many of our manufacturing facilities are also ISO 9000 registered. The goal of our total quality management program is to provide you, our customer, with total satisfaction.

OUR TECHNICAL HOTLINE

To help you determine which Best®

general-purpose or chemical resistant glove to use in a specific application, contact Best Technical Services at 800-565-BEST. One of our trained technical service personnel will be happy to assist you.

GLOVE LAUNDERING

Many of our gloves can be laundered, which means they can be washed or dry cleaned and then re-used for added value. We include specific laundering instructions with these appropriate Best styles.

SANITIZED®

Best supported and cut-and-sewn gloves are Sanitized®, a value-added process in which we chemically treat the fabrics we make for our gloves with an anti-microbial bacteriostat, which retards the growth of mold, mildew, and other normal skin microbes and helps negate the effects of perspiration. This means Best Sanitized® gloves stay fresher and serviceable longer, giving you greater value.

FREE HAND & ARM HAZARD ASSESSMENTS

For a comprehensive, no-obligation analysis of all your glove needs, including chemical-resistant gloves, please contact Best Customer Service at 800-565-BEST. A Best sales representative will then contact you or the appropriate individuals within your organization to discuss and arrange details of the assessment. After the assessment, you will receive a detailed, written report with our recommendations for a hand-and-product-protection program designed to give you the most cost-effective combination of safety and productivity.

BEST BET TRIAL ORDER PROGRAM

Our Best Bet trial order program lets you evaluate our gloves in actual applications and conditions on a no-risk, satisfaction-or-no-pay basis. Trial order the style most suited to your needs. We'll pay the

freight. You'll have thirty days from invoice date to test the gloves to determine if they're the solution to your particular hand or product protection problem. We bet they will be, but if you're not completely satisfied, return any used and new gloves. It's that simple. Ask your authorized, local Best distributor, your Best sales representative or call our Customer Service Department (800-565-BEST) for details on how to place a Best Bet.

FREE GLOVE SAMPLES

Upon written request, Best will provide you with actual glove samples to assist you in determining which Best glove to use in a particular application. You may either e-mail us your request online through the Medical and Industrial Products pages or send your written request to:

CHEMREST.COM

Best® CHEMREST.com is the website dedicated strictly to selecting gloves for chemical resistance. This user-friendly website contains ASTM and CE compliant chemical resistance data for over 9000 chemical tests and includes the following features.

- Over 300 pure chemicals or chemical mixtures tested
- 16 different Best gloves tested including new styles
- ASTM test methods for two levels of exposure, heavy and intermittent
- ASTM F739-96 Standard Test Method for Permeation by Liquids or Gases Under Conditions of Heavy Continuous Exposure where glove materials are totally immersed in the test chemicals for eight hours
- ASTM F1383-96 Standard Test Method for Permeation by Liquids or Gases Under Conditions of Intermittent Contact where glove material is exposed to the test chemical intermittently
- Degradation testing at four time intervals
- EN 374 ratings for permeation breakthrough time
- Toxicity and risk information for over 300 chemicals
- NFPA health, flammability and reactivity for over 300 chemicals
- International Agency for Research on Cancer status for each chemical
- American Conference of Governmental Industrial Hygienists "Skin-Notation" chemicals are noted
- Environmental Protection Agency's "Extremely Hazardous Chemicals" are noted
- Pictures of each glove with complete information on ordering and uses
- Search the Website by chemical name or CAS number
- E-mail technical questions to Best Technical Services or contact your Best representative in your national or international area
- Print out chemical resistant table to your printer for each chemical
- Linked to Bestglove.ca

CUSTOMIZED CHEMREST™ TESTING

Under certain conditions, we can use our state-of-the-industry permeation testing equipment to analyze the particular chemical or chemical mixture from which you're seeking protection to help you determine which Best chemical-resistant glove you should use. Call 800-241-0323, for more information.

Some testing procedures are subject to a modest service fee. Quotations offered upon request.

LIMITED WARRANTY AND DISCLAIMERS

Best warrants only that gloves manufactured by Best will be free from defects in materials and workmanship at the time of manufacture. This limited warranty expires one (1) year after shipment. This limited warranty is exclusive and in lieu of all other warranties, express, implied, or statutory. Best's entire obligation and the exclusive remedy to any party for breach of this limited warranty shall be limited to replacement or refund of the original purchase price of the product, at Best's option, and subject to customer's compliance with Best's Returns policy. Best's limited warranty shall not apply, however, to Best-made gloves that have been subject to misuse, accident, or negligence during service, handling, or storage.

DISCLAIMER OF IMPLIED WARRANTIES

All implied warranties which may arise by implication of law or application of course of dealing or usage of trade, including, but not limited to, implied warranties of merchantability or fitness for a particular purpose, are expressly excluded. There are no warranties which extend beyond the description on the face hereof. The end user is solely responsible for the suitability of the glove selection for a particular application.

FORCE MAJEURE

Best shall not be liable for delay in or failure to perform any of its obligations if the delay or failure results directly or indirectly by Force Majeure. "Force Majeure," as used herein means any law, order, regulations, or government action; failure or delay of transportation; suspension or cancellation of any required license(s); insurrection, riots, national emergencies, war, acts of public enemies, strikes or other labor difficulties; inability to obtain necessary labor, manufacturing facilities, materials or components from Best's usual sources; fires, floods or other catastrophes; acts of God or any cause of like or kind beyond our control.

CFIA (formerly Agriculture Canada)

Glove is accepted by the Canadian Food Inspection Agency.

IN COMPLIANCE* 21CFR, PARTS 170-199

*Glove is made using only listed materials and levels outlined in the Code of Federal Regulations (21CFR), parts 170-199, and is acceptable for use in food contact applications.

NFPA

Certified NFPA Standards (National Fire Protection Association)

CUT LEVEL

Independently tested, our cut level results are obtained using ANSI/ISEA 105-2000, ASTM 1790 standards.
