

PACER 15

Mixing Arms		Timer	Motor	Drive	Optional Accessories
Single		15 Min.	1/3 HP	115V, 60 Hz, Cord Electric	
Dimensions					
Width 23.5"	Depth 17"	Height 17"	Weight 120 Lb.	Notes: Most economical unit in Pacer line	

The Pacer 15 single arm mixer is the most economical machine in the Pacer line allowing you to mix one container at a time (to mix two containers simultaneously, see the Pacer Dual models). The multisize clamping action provides a secure holding system for containers of many shapes and sizes and the manual timer can be set in increments up to fifteen minutes.

The high speed, bi-axial motion creates a shear that ensures a complete mix. Colors and accents are quickly and evenly distributed throughout the container. The Pacer's heavy duty design allows for the mixing of industrial weight coatings, adhesives, inks and more. The unit plugs into any standard wall outlet and can be easily moved between areas and mounted on either a floor stand or counter stand depending upon your preference.

The Pacer is available in a full range of drives and timers and the Safety Enclosure options available provide for maximum operator safety. A full one year parts and labor warranty comes standard.
